EDUCATION

D. Y. Patil School of Engineering and Technology, Pune

Bachelor of Technology in Computer Engineering

July 2021 – Jun 2025

CGPA : 9.17

EXPERIENCE

Software Engineer Intern

Zidio Development

Aug 2024 – Oct 2024

Bangalore, India

- Engineered scalable web applications using **React and RESTful APIs**, optimizing backend request processing and database queries to **reduce latency** and boost system performance by **25%** while ensuring reliability and seamless user experience.
- Architected highly scalable, **modular component** structures in **React.js**, reducing code complexity by **15%** and accelerating feature delivery cycles by nearly **36 hours** while improving maintainability and development efficiency.
- Developed **mobile-first responsive interfaces** using modern frontend practices, optimizing **rendering** and ensuring consistent, high-quality user experiences across desktop and mobile platforms while enhancing accessibility and compatibility.
- Delivered **production-ready full-stack** features using **Node.js, Express**, and **modern JavaScript** practices, enhancing system efficiency by **12%** while improving scalability, performance, and overall application reliability.

Web Development Intern

Suven Consultants and Technology Pvt. Ltd.

Aug 2023 – Sept 2023

Remote, India

- Optimized frontend rendering pipelines and backend **API integrations**, reducing application load time by **30%** while enhancing UI **responsiveness**, improving performance, and delivering faster, seamless user interactions.
- Refactored legacy **application modules** and eliminated **system bottlenecks**, improving performance by **20%** while enhancing code maintainability, scalability, **long-term system reliability**, overall code quality, and development efficiency.
- Built responsive **UI components** using modern **HTML, CSS, and JavaScript**, improving cross-device usability and boosting user engagement by **15%** while enhancing performance, accessibility, and overall user experience consistency.
- Collaborated with **2 engineering teams** to **debug production issues**, validate new features, and maintain code quality using **Git-based workflows** while improving deployment reliability, **version control efficiency**, and team productivity.

PROJECTS

InstaStay – Accommodation Booking Platform | [Github](#) [Live Link](#)

- Developed a **MERN stack accommodation booking platform** supporting **authentication, property listings, reviews**, and **map-based search**, handling **50+ users** and **15+ property listings** across multiple locations.
- Designed scalable backend architecture using **Node.js, Express.js, RESTful APIs** for booking workflows and property data management following **MVC architecture** while ensuring performance, maintainability, and request handling.
- Integrated **Cloudinary media storage** and external **map APIs** to increase **efficient image management** by **40%** and **real-time property location visualization** while improving system efficiency, reliability, and feature usability.
- Enhanced **MongoDB queries** and implemented **middleware validation**, improving **data retrieval speed** and ensuring reliable backend request handling while **enhancing data integrity**, system stability, and application efficiency.

Child Diary – School Management Platform | [Github](#) [Live Link](#)

- Created **public pages** to display school information and built **protected pages** for **online diary management, announcements** supporting **45+ users** with secure data submission, ensuring role-based access, and seamless interaction.
- Implemented secure **role-based authentication** using **JWT and bcrypt** for **Admin, Teacher, and Student** dashboards while strengthening **data security**, access control mechanisms, **user authorization**, and overall system reliability.
- Designed scalable **RESTful APIs** using **Node.js and Express.js** handling **1000+ API requests** for managing announcements, **homework, timetables**, and **academic records**, while ensuring efficient system performance.
- Deployed **email verification** and **admin approval workflows** using **Nodemailer** to strengthen platform security and prevent **unauthorized registrations** by **55%** while improving user validation, data protection, and system reliability.

ACHIEVEMENTS

- Solved **950+ Data Structures and Algorithms** problems across [LeetCode](#) and [GeeksforGeeks](#).

TECHNICAL SKILLS

Languages: Java, C, JavaScript

Frontend: HTML, CSS, React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Backend Services

Databases: MongoDB, SQL

Tools & Testing: Git, GitHub, Postman, Debugging, Jest, Render, Vercel, API testing, AWS (Basic)

Relevant Coursework: Data Structures & Algorithms, OOP, Networking, Database, System Design, Operating System
